Opportunities and Threats

Opportunities

The company has made significant inroads in few key markets globally. Roto brand is getting good acceptance. This would provide lot of opportunities in export markets.

Modernization & Expansion project, which is slated to commission by the end of the current Financial Year, would enhance company's manufacturing capabilities and infrastructure. This will enable the Company to meet increased demands of its products and would also provide significant opportunities to enter Mining Industry in Australia and other major industries such as oil & gas Offshore & Marine, etc.

New product launches as planned backed by strong R&D would significantly compliment the current product lines and enable the Company to enter new markets and establish itself as a complete Positive Displacement pump package provider. This would strengthen the Company's position in all its major markets.

Threats

There is significant presence of local players in the domestic market, who are trying to take away the market for simple & easy application base in its main product line. They offer lower prices and flexible commercial terms to win over the customers. Further, the Indian market is becoming more and more attractive to global players. Two such major players have started operations and have plans to strengthen their base. This would make the market more competitive posing higher pressure on margins.

Risk and Concerns

There is going to be pressure on margins due to steep increase in input costs & Interest rates and increased competition. The Government approach to rein in the Inflation is having a dampening effect on the growth of the economy and sluggishness towards reforms is hampering the inflow of Foreign Investments. Cheap Imports backed by favorable commercial terms from China pose a definite risk to the Domestic industry.

Internal control systems and their adequacy:

The Company has an adequate system of internal controls implemented by the management towards achieving higher efficiency in all areas of operations. These controls have been designed to provide a reasonable assurance with regard to maintenance of proper accounting controls, monitoring of operations, protecting assets from unauthorized use or losses, compliances with regulations and for ensuring reliability of financial reporting.

The Audit Committee of the Board of Directors regularly reviews the adequacy of internal controls and takes the necessary corrective actions, wherever required.

Human Resources/Industrial relations

We believe that in order to sustain growth in the domestic as well as in global markets under competitive conditions, the Human Capital of the company should have high level of motivation and knowledge.

The Company continues to focus and invest in human resources development to provide an open work culture and rewarding career opportunities to all its employees.

For your company the key challenge for the year 2012-13 was recruitment of professional engineers, managers & staff at various levels. HR successfully recruited 89 people in response to various business needs during the year. Manpower strength as at 31.03.2013 was 433 people as compare to 345 people in the previous year.

The overall employee relations were peaceful and harmonious throughout the year. The Company continued to create conducive work environment with opportunities for growth and learning by implementing robust and comprehensive HR policies.

The Company's strength is its in-house technology and committed manpower. The Company has undertaken an expansion and modernization of Project "ROTO 500" to augment the expected increased demand, which would result in improved performance of the Company.
