Dear Sir / Madam,

Sub: **Press Release**

In reference to the above captioned subject, please find enclosed herewith Press Release with respect to unveil of Innovative Cake Pumps tiled as “Roto Pumps Unveils Innovative Cake Pumps for Efficient Pumping of Sludge Cake at IFAT 2024”

This is for your kind information, records and dissemination please.

Thanking You

Yours Faithfully,
For **ROTO PUMPS LTD.**

Roto Pumps Unveils Innovative Cake Pumps for Efficient Pumping of Sludge Cake at IFAT 2024

Mumbai, November 12, 2024: Roto Pumps Ltd. (BSE: 517500, NSE: ROTO), a globally recognized Indian multi-national leader of Positive Displacement pumps with over five decades of fluid engineering excellence successfully unveiled its latest product the Roto Cake Pumps at IFAT 2024, held from October 16th to 18th at the Bombay Exhibition Centre, Mumbai. The much-anticipated product launch marks a major milestone in the company's mission to deliver high-efficiency pumping solutions for the most challenging wastewater industry applications.

The Roto Cake Pumps offer a clean, odourless solution for handling highly viscous and non-flowable liquids with high dry solid contents ranging from 21% to 45%. These pumps are designed with a spacious feed hopper, a separate compression zone, an auger feed screw with enlarged diameter & extended pitch, making them ideal for conveying highly viscous media.

Traditional methods in India involve manual transportation and processing of sludge cake, often resulting in inefficiencies and high costs. Roto's Cake Pumps provide a reliable alternative; as it easily handles sludge cake with flow rate of up to 100 cubic meters per hour while withstanding pressures of up to 24 bar. This makes it a crucial asset for industries looking to optimize their processes and comply with evolving environmental regulations.

Mr. Harish Chandra Gupta, Chairman and Managing Director of Roto Pumps Ltd., commented on the positive reception of the product, saying, "Our latest product "Roto Cake Pump" addresses the critical need for efficient & reliable pumping of sludge cake in wastewater treatment industry. With a comprehensive range of pumps tailored for various applications and duty parameters, we're already seeing a huge demand in international markets, and we expect this trend to grow as industries adopt cleaner and more sustainable technologies."

He further added that, "Although the initial focus of the product is on the international market, where we have already supplied units to the U.S. and is in discussions with clients in Germany. As environmental regulations become more stringent, especially regarding pollution control and waste management, the potential applications for these pumps are expected to expand domestically."

Roto Pumps has long been a leader in the positive displacement pumps market, both in India and internationally. The launch of the Roto Cake Pumps aligns with the company's broader strategy to expand its product portfolio and strengthen its presence in global markets such as North America, Europe, South East Asia, the Middle East, and Africa. The growing demand for specialized pumps, driven by

industrial growth, government infrastructure initiatives, and the global focus on clean energy and sustainability, positions Roto Pumps to continue its trajectory of growth. The company's legacy of innovation, combined with its strong domestic and international footprint, makes it a key player in the industry.

With its headquarters in Noida and a strong export base in over 50 countries, Roto Pumps is actively working towards expanding its market reach. The company aims to become one of the top five manufacturers of positive displacement pumps globally, further solidifying its position in the market.

About Roto Pumps Ltd.

A globally preferred brand in positive displacement pumps, Roto Pumps is a public listed company with presence across 5 continents and a rich legacy of over 50 years. Established in 1968, Roto Pumps is the pioneer manufacturer of Progressive Cavity Pumps in India, renowned for providing efficient and reliable pumping solutions to a diverse range of industries including Wastewater, Sugar, Paper, Paint, Oil & Gas, Chemicals & Process, Ceramics, Food & Beverages, Renewable Energy & Power, Mining & Explosives, Marine & Defense and many more.

With its state-of-the-art manufacturing unit based at Greater Noida, India & Ultra-modern R&D centre based at Noida, India, Roto Pumps is successfully exporting to more than 50 countries.

Roto Pumps is ambitiously working towards its expansion by strengthening the strategic global partnerships, establishing new branches & subsidiaries across continents and aims to be among the top 5 positive displacement pump manufacturers with a presence in 100+ countries.
